

MARATONA BIR-ROTI 2014.

This great event commemorates another anniversary since its first performance way back in 1994. It is with great pride and admiration that A.L.P.S. contributed over these past years from inception date, to promote and to help for bigger success year after year. From statistics that are made available to us, we can mention that the total fund raising for the years 1994 – 2013...has reached a sum of Euro 452,105.00.

It all comes from the hearts of generous LICEO students and adults, who in a concerted effort always strive for a bigger success each year.

The Association of Lyceum Past Students is not only an integral part of the Maratona Bir-Roti with active participation but, with its involvement, the continued link between the Lyceum days of old and today's students, is working hand in hand for the benefit of such a noble cause.

Today's students, together with the teachers and all LICEO past students, are urging everyone to come and give a helping hand. Every little bit helps to raise even more funds and making this years' Maratona greater success. The dates 14th to 16th March should be pencilled in all your diaries. Do come along and participate in this fund raising event. Together, we want to help in collecting a record sum this year, for the purchase of a number of defibrillators that may be used for life saving when placed at every school in Malta & Gozo. Your support is earnestly needed.

At a Press Conference given at the Lyceum foyer on the 10th day of March 2014, a Cardiologist by the name of Mr. Andrew Deaner was present. He flew in from England to give a helping hand to LBM Organising Committee for greater success this year with the holding of Maratona 2014. Mr. Deaner had saved a life by using a defibrillator at a football ground during an important match abroad, when a famous player had a cardiac arrest. Had it not been for the quick action taken by the Mr. Deaner who was there present as a spectator, the player would have died. All Proceeds from this year's Maratona Bir-Roti are therefore intended for the purchase of a number of such defibrillators. It is sincerely hoped that enough funds can be collected so that every school in Malta & Gozo may benefit and have one such defibrillator installed.

Photos are showing some Lyceum Cyclists who accompanied Mr. Andrew Deaner and other distinguished personalities.

A.L.P.S, President George Stagno Navarra and other council members were also present for this Press conference.
